

# DT MOBILE

Bring true mobile connectivity to your fleet management platform

Extend the DriverTech platform beyond the cab with DriverTech’s Android and iOS driver companion app. Whether your driver is conducting a pre-trip inspection, completing delivery paper work at a customer facility or is at home taking a 34 hour reset, DT Mobiles provides tools to keep you and your drivers connected, informed and more productive.

### Mobile DVIR

Ensure drivers conduct thoroughly complete their pre and post trip vehicle inspections by adding tools to document potential issues. Capture pictures of defects and transmit those directly to your maintenance team.

### Mobile Messaging

Extend DriverTech messaging capabilities to outside the cab or at home. Drivers receive and respond to dispatch or text messages on their mobile device. Drivers are alerted when new messages arrive ensuring quicker and more efficient communications.

### Hours of Service Anywhere

Regardless of where they are, DT Mobile keeps drivers informed on their Hours of Service information. Synchronized with your in-cab ELD, drivers can view all their critical hours of service timers and alerts.

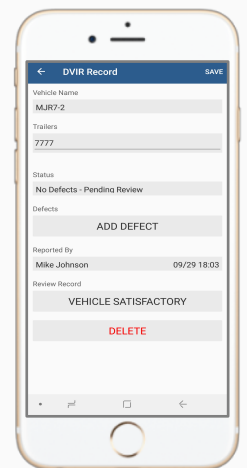

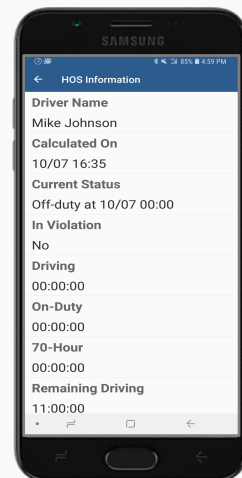

## How it Works

**DT 4000**  
Installed in the vehicle

**DT Cloud**  
Synchronizes all connected devices

**DT Mobile**  
Installed on driver’s Android or iOS device
