

**THE SHORTEST
DISTANCE BETWEEN
TRUCKERS AND PROFITS.**

DRIVERTECH[®]
DRIVING ONBOARD INTELLIGENCE

The Most Advanced Driver and Fleet
Management Systems on the Market

STREAMLINE EVERY JOB WITH TRUCKPC™ IN THE CAB.

Nothing improves driver performance, asset utilization and overall efficiency of your fleet like TruckPC™. Not only do you enjoy easy-to-use electronic hours of service with over-the-air regulation updates, but a full suite of navigation and communications apps keep you on the road to increased profitability and customer satisfaction. Features J1939 and J1708 connectivity for remote vehicle monitoring and reports.

ELECTRONIC HOURS OF SERVICE

DriverTech's suite of apps provide a robust, fully-automated electronic Hours of Service (HOS) system. A powerful rules-based processing engine operates in real-time, so you're always compliant with the latest regulations.

- Keep hours of service records electronically in compliance with 49 CFR, 395.16
- Manage vehicle inspections and pull reports and repair records through Fleetwatcher, DriverTech's web portal
- Receive over-the-air updates as regulations change
- Get alerts for when the driver is running out of HOS hours
- Easy to learn and use, fully compliant ELD

MAPPING AND NAVIGATION

No need for drivers to key in an address from dispatch—with integrated GPS and nationwide street level mapping, drivers get turn-by-turn directions and touch screen mapping, for more on-time deliveries and customer satisfaction.

- Stay on course with truck specific turn-by-turn navigation
- Track vehicle location and other information in real-time
- Create geofence alerts when a driver enters or exits an area designated remotely through Fleetwatcher using workflow

MESSAGING AND COMMUNICATION

When you choose DriverTech's cutting-edge solution for your mobile communications system, you make the smart choice for maximizing fleet productivity, improving customer service and driving down communication costs.

- Use hands-free text-to-speech conversion while driving
- Supports two-way messaging
- Send PDF attachments from the Fleetwatcher Portal
- Get a unique email address for every TruckPC

LIBRARY FUNCTION

- TruckPC includes a library application so you can save important documents and files for easy access.
- Save customer designated content into TruckPC
- Gigabytes of storage space for videos, PDFs and other content
- Continuously syncs with your FTP site over wi-fi to update library content

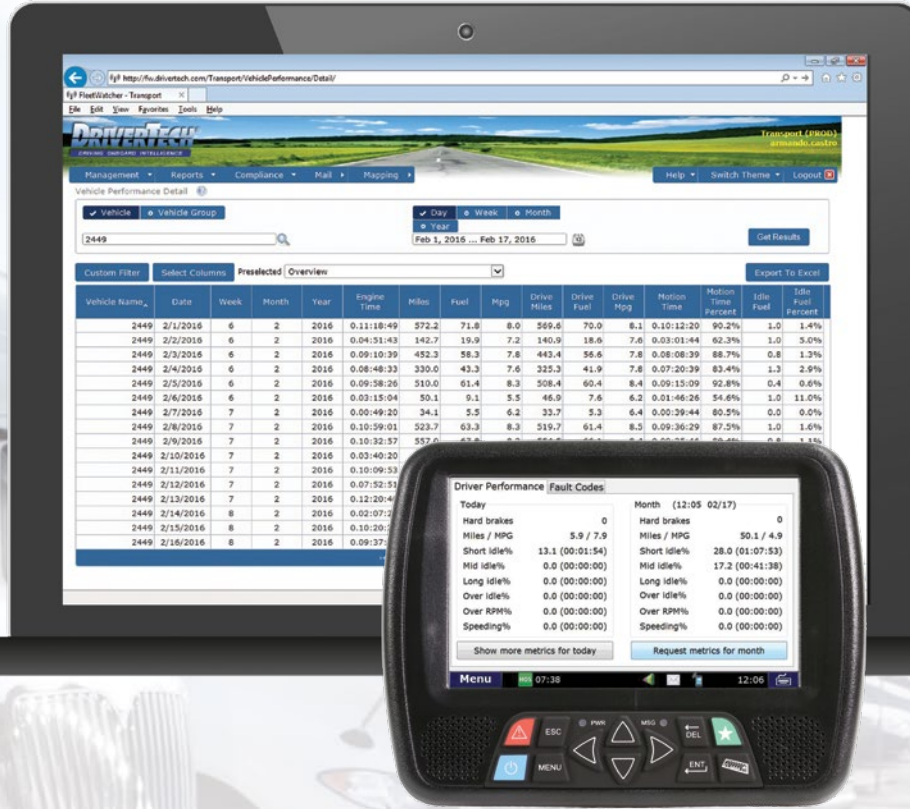

MAXIMIZE GLOBAL EFFICIENCY THROUGH FLEETWATCHER.

FLEETWATCHER WEB PORTAL

Using the Fleetwatcher web portal, you can constantly achieve greater driver and truck efficiencies.

- Easy to use, easy to learn
- Customizable reports
- Breadcrumbs embedded with status data
- Web-services interface to TMS software

VEHICLE PERFORMANCE

Keeping all of your trucks in peak condition is essential. Fleetwatcher includes performance metrics such as excessive speed, RPM, idle time and trouble codes to help you keep trucks on the road.

- Receive J1708 and J1939 engine fault codes and ECM information for real time truck info and diagnostics
- Monitor critical event reporting and alerts for hundreds of defined variables, such as speeding, hard braking, idling and more
- Build driver performance scorecards to optimize fuel consumption, vehicle wear and tear, hours of service and more
- Review EODR (more than 200 elements) to maximize driver and vehicle performance
- Manage Daily Vehicle Inspection Reports (DVIR)
