

Vehicle Performance

The Vehicle Performance reports are comprised using some of the 200+ various data points available. See the [End of Day Rollup](#) document for a full listing of the available data or choose a specific report below for more information

- [Vehicle Detail](#) — provides over 200 data points for reporting and analysis, including an overview report, as well as specific reports for fuel, idle, speed, and cruise control.
- [Vehicle Summary](#) — provides all of the most critical vehicle performance metrics in an easy-to-view format.
