

Driver Performance

The Driver Performance reports are comprised of some of the nearly 200 various data points available. See the [End of Day Rollup](#) document for a full listing of the available data or choose a specific report below for more information

- [Driver Detail](#) — provides a vast array of performance metrics, including an overview report, as well as specific reports for fuel, idle, speed, and cruise control.
- [Driver Summary](#) — provides all of the most critical driver performance metrics in an easy-to-view format.
- [Driver Unassigned Data](#) — provides all miles and drive time data recorded on the in-cab device that has not been assigned to a particular driver.
