Unit Turns Off While Driving

Unit Turns Off While Driving

Problem:

The unit turns off while driving or starting the truck.

Solution:

- 1. This will need to be routed to the shop for troubleshooting, here are some tips for the shop
 - a. Shop will need to troubleshoot the connections, verify they are secure.
 - b. Verify the truck is not having low battery issues.
- c. Meter the voltage while the truck's engine is off, being turned over, and while idling.

 2. Please call technical support if the issue has not been resolved.
