How-to Turn On Wifi for all trucks
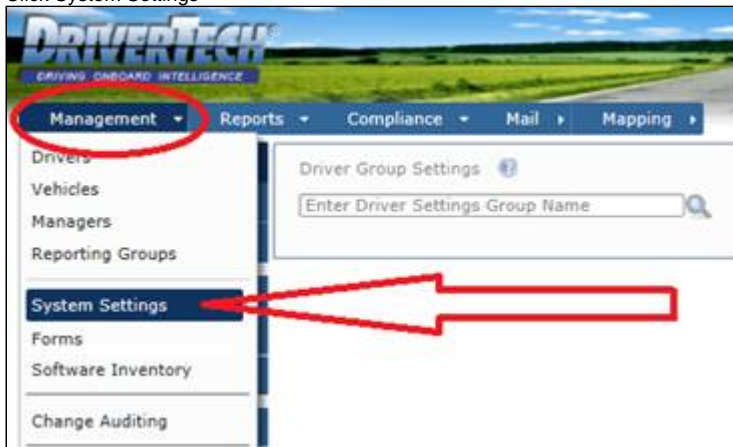

How-to Turn On Wifi for all trucks

Step-by-step guide

- As soon as each units reboots that will start using the new settings and start searching for this Wifi Access Point.
- This will happen automatically and will not require any interaction from any of your drivers.
- Below are the steps used to add the Wifi Settings. You can use these same steps to add up to 10 different Secured Networks.
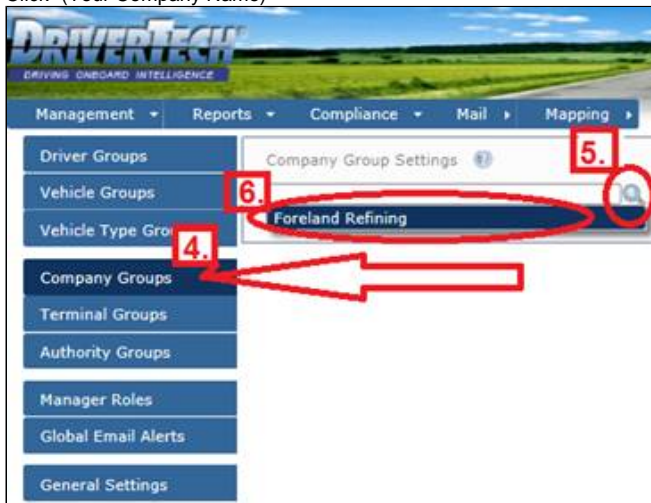

1. Log in FleetWatcher - http://fw.drivertech.com/

1. Click Management
2. Click System Settings

3.
4. Click "Company Groups"
5. Click "Magnifying Glass"
6. Click "(Your Company Name)"

7.
8. Click "Edit"

9.

10. Scroll down
11. For your First named "Network 1:" Copy and Paste your SSID under the "SSID" column
12. For your First named "Network 1:" Copy and Paste your Password under the "Key" column

13.

14. For your Second named "Network 2:" Copy and Paste your SSID under the SSID column
15. For your Second named "Network 2:" Copy and Paste your Password under the "Key" column
16. You may enter 1 or up to 10 different Networks setup.
