## How-to Enter Roadside Audit Mode

How-to send HOS ELD logs to Enforcement Officer for Roadside Audit

"How-to Enter Roadside Audit Mode" are steps 1 through 5.

### Step-by-step guide

1. Touch the "HOS" icon.

Ma	il Navigation	HOS	G SysInfo	Stats	Library
Menu	HOS 04:39				Logoff 11:40 <del></del>

2. Touch the "Options" tab. This will bring up the Enforcement View button.

Fuel & Mileage	DVIR	bys		t Empty Call

4. Choose whether or not you would like to use a password to exit the Enforcement View mode after you have completed your tasks in Enforcement View. This option will either require a password to exit Enforcement View or not. If you do not want to enter a password to exit Enforcement View, touch "No". If you would like to use a password to exit Enforcement View, touch "Yes" and follow the prompts to verify your Driver Code Password. NOTE: This password is normally NOT your Driver Code, but instead is a password that was set up by

your in office personnel. Ask your Safety personnel for more details.

5. IMPORTANT NOTE: You will now see an Enforcement View icon in the bottom left hand corner area of your screen.

This indicates you are in <u>Enforcement View</u>. a. To send your HOS logs to the DOT representative while pulled over or at roadside, touch "Send HOS logs to enforcement".

The enforcement officer or DOT representative should receive the information within moments on his computer, if there is cell or wifi coverage.

6. **COMPLETE**: If there is cell or wifi coverage you have successfully sent your HOS logs to the enforcement officer or DOT representative. If there is no cell or wifi coverage where you are, you may need to continue to the next step.

7. To send logs to a mobile device that can be handed to enforcement, touch "Learn how to send to a mobile device that can be handed to enforcement".

10. Associate with DT181614, (your individual number may vary) enter the password "drivertech"

- 11. Select sign in prompt, or navigate to ra.drivertech.com, which will show this display.
  - a. Clarification of "or navigate to ra.drivertech.com"
  - b. Open a web browser on your phone. On an iPhone, open Safari. On Android, open Chrome
  - c. In the address bar (NOT the search bar), type in ra.drivertech.com , tap Go

12. You may now hand the mobile device to the enforcement officer or DOT representative.

For mobile instructions go to:

#### http://ra.drivertech.com/

Г

There is also an instructional video: Click Here

#### Addendum:

Sometimes the mobile device will come up with the following:

## How to Enable Roadside Audit Mode

Your mobile device is not routing traffic through your Truck PC. Please follow the instructions bellow.

- Open settings on your mobile device.
- Enable airplane mode.
- Switch to WiFi settings.
- Associate with the access point 'DT(TRUCK PC SERIAL NUMBER)' such as DT12345
- Enter the password 'drivertech'
- Open your web browser and navigate to 'ra.drivertech.com'
- http://ra.drivertech.com/ is the web address we route the phone to if it is receiving internet.
- Click on the link above. You will notice that the web page it displays is the message you are currently receiving on your phone.
- Prior to you connecting to this URL, <a href="http://ra.drivertech.com/">http://ra.drivertech.com/</a>, and once the phone detects no internet, your phone will route traffic through the DriverTech device, resulting in displaying the HOS logs for the currently logged in driver code.
- You are seeing this message below because most phones will cache this page and so you may need to clear cache. A lot of the phones are different so it may be a good idea to google it.

#### This above information is pertinent if you had a full set of HOS logs.

If you do not have a full set of HOS logs, such as in a testing/training environment, it can muddy the water.

- We know there is a bug that occurs when you try to connect to a device with a full set of blank logs.
- We have also determined that you can see this bug if you have a full 8 days of blank uncertified or certified logs.
- When trying to back fill log data(so you don't have blank logs), there is a certain amount of statuses you must have in order to get past this bug.

Best Practices for in office training or connecting to a unit with blank HOS:

- 1. Try to connect directly following a reboot
- 2. Always use Airplane mode
- 3. Before entering Enforcement View on the device and while in Airplane mode, go to ra.drivertech.com once, after you have connected to http://ra.drivertech.com/ when you had internet.
