

WEB 6.12

- **Replaced set 'Manual VIN' checkbox to prevent JBUS from updating VIN**
 - Checkbox has been removed that prevented updating of VIN by Vehicle's JBUS.
 - Instead, if user updates the VIN manually via web portal the Manual VIN flag will be set automatically indicating that the VIN was entered manually.
 - BUT, if the vehicle's JBUS reports a VALID VIN it will replace the manually entered VIN.
- **NEW report: Vehicle Malfunctions (see ["Help Doc: Vehicle Malfunctions"](#))**
 - Provides summary and detail when the ELD records a vehicle malfunction as outlined in FMCSA ELD rules set.
- **NEW report: DT Fuel Sensor (see ["Help Doc: DT Fuel Sensor"](#))**
 - Provides aggregate summary and individual detail when the ELD records a DT Fuel Sensor events (DT Fuel Fill, DT Fuel Drain, DT Fuel Update with tank levels (via Position update)).
- **IMPROVED: Set Destination based on Pin Location not nearest address**
- **IMPROVED: General performance improvements of some reports and larger data request**
- **IMPROVED: Standard Output file to FMCSA**
