

Vehicle Detail

The Vehicle Detail report provides on a vast array of performance metrics, including an overview report, as well as specific reports for fuel, idle, speed, and cruise control. The report can be run for a selected vehicle or vehicle group.

The Vehicle Detail report is ideal for identifying both the top and bottom performers in your organization by vehicle, instead of by driver. It is also useful if you would like to download a large amount of vehicle performance data to further manipulate in Excel format.

Full vs Pre-Selected Fields

This report offers over 200 data points for reporting and analysis which can be selected Ad-Hoc (as desired) or by using one of the Pre-Selected groups

All Field Detail

Full data detail is provided within the [End of Day Rollup](#) document

Pre-Selected Report Types

The following are defined as pre-selected report types comprised of data fields specific to the purpose of each type:

Overview

The Overview tab provides all of the fields found on the Fuel, Idle, Speed and Cruise Control tabs in one spreadsheet (122 total metrics).

Fuel

The Fuel tab provides all vehicle performance metrics related to fuel consumption (22 total metrics).

Idle

The Idle tab provides all vehicle performance metrics related to idling (21 total metrics).

Speed

The Speed tab provides all vehicle performance metrics related to speed (16 total metrics).

Communications

The Communications tab provides all communication metrics related to cellular, Wi-Fi and *satellite usage (28 total metrics).

Cruise Control

The Cruise Control tab provides all vehicle performance metrics related to cruise control use (9 total metrics).
