General Settings

General Settings apply to the entire DataStore and some values cannot be modified by end users

Setting Details

Data Store Type
Data Store Type is *prohibited from end user modification* and defines functional characteristics:

- Default
- MOA: Multiple Operating Authority
- Microfleet (future)

Enable Hierarchical Reporting Groups
Enables Hierarchical Reporting Groups which will follow structure of configured Company -> Terminal -> Driver/Vehicle/Manager assignments.

We strongly recommend you review the following guide on Reporting Groups prior to changing this option.

Disable Message Composition
Disables the ability to Create, Reply, or Forward Messages.
May be useful to organizations who need to ensure that Messages originate from an integrated system instead of the Web Portal
