

# Patching

From time to time, Rand McNally will update the software version on your company's in-cab devices. The Patching feature allows you to view information related to any software updates that occur.

- [Queue Patches](#)
- [View Patch History](#)

## Queue Patches

To view queued patches of a particular vehicle, enter the **Vehicle** in the text box or click the [blocked URL](#) icon and select from the drop-down menu.

A spreadsheet will appear of information regarding any queued patches.

## View Patch History

To view the patch history of one or more vehicles, search by **Vehicle** or **Vehicle Group**, enter the vehicle or vehicle group name in the text box or click the [blocked URL](#) icon and select from the drop-down menu, enter a date range, and click [Get Results].

A spreadsheet will appear of information regarding all previously queued patches.
