

# State Mileage

The State Mileage report provides a state-by-state breakdown of fuel consumption and miles traveled for each Vehicle and can be run for a specific vehicle, vehicle group, or all vehicles. You can also filter the report so you can more easily view state mileage and fuel consumption. This information can then be used when filing International Fuel Tax Agreement (IFTA) paperwork.

For a breakdown of mileage withing each state see [Trip Detail](#), for a list of all occurrences of Region/State Line crossing see [Regional Crossing](#)

The State Mileage report provides the following:

- [All](#)
- [Vehicle & Region](#)
- [Region](#)

The default spreadsheet displays all data columns. Vehicle & Region and Region filters sum up the data so you can view them by region.

## All

Displays miles traveled and fuel consumed for each date in the selected date range by vehicle and state/province.

## Vehicle & Region

Sums up miles traveled and fuel consumed for each vehicle by state/province.

## Region

Sums up all miles traveled and fuel consumed by state/province.
