

Why are violations from a different month showing up in my report for the month I chose?

Question:

Why are violations from a different month showing up in my report for the month I chose?

Answer:

The violations report gets all violations by both HOS LogDate and by HOS SubmittedOn/RecordedOn time.

It's like this in case a previous log is created/edited & submitted later in time, also if you edit a previous log later and introduce a violation.
