

Trip Detail

The Trip Detail report provides detailed location history for Vehicles and Drivers. Each record contains detail from the Beginning to the Ending of Vehicle Movement

For a summary of Mileage by State see [State Mileage](#) or for an overall view of Region/State line crossings see [Regional Crossing](#)

Trip Detail records capture motion segments of a vehicle.

Driving segments are displayed with a green background while Stop or Idle are displayed in white

Driving segments (in green) are transmitted to the DataCenter when the vehicle is exits **Driving** status OR the ignition is turned off.
