WEB 6.12

- **Replaced set 'Manual VIN' checkbox to prevent JBUS from updating VIN**
    - Checkbox has been removed that prevented updating of VIN by Vehicle's JBUS.
    - Instead, if user updates the VIN manually via web portal the Manual VIN flag will be set automatically indicating that the VIN was entered manually.
    - BUT, if the vehicle's JBUS reports a VALID VIN it will replace the manually entered VIN.

- **NEW report: Vehicle Malfunctions (see** "Help Doc: Vehicle Malfunctions"**)**

    - Provides summary and detail when the ELD records a vehicle malfunction as outlined in FMCSA ELD rules set.

- **NEW report: DT Fuel Sensor (see** "Help Doc: DT Fuel Sensor"**)**

    - Provides aggregate summary and individual detail when the ELD records a DT Fuel Sensor events (DT Fuel Fill, DT Fuel Drain, DT Fuel Update with tank levels (via Position update)).

- **IMPROVED: Set Destination based on Pin Location not nearest address**

- **IMPROVED: General performance improvements of some reports and larger data request**

- **IMPROVED: Standard Output file to FMCSA**
